RESTRICTION

Claim Rejections - 35 USC § 112

1. Claims 1-53 are rejected under 35 U.S.C. 112, second paragraph for undue multiplicity.

37 CFR 1.75 states:

(a) The specification must conclude with a claim particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention or discovery.

(b) More than one claim may be presented provided they differ substantially from each other and are not unduly multiplied.

In this instance, Examiner acknowledges that Applicant needs and deserves to be able to draft claims of varying scope to afford Applicant the best protection. However, the 9 independent claims are all directed to one feature, each with its own shades of meaning and possible interpretations, which creates too much chance for confusion and error.

The office and the Examiner want very much to do a good job on this case, but if 9 independent claims are processed, it is deemed that the Examiner, the Board and the Public will have a high chance of confusion and error.

Furthermore, the fairly simple concept of a router bit system, router bit holding assembly, router bit, router and bit system does not warrant 9 independent claims since each repeat varying shades of meanings and possible interpretations of each other for Applicant's overall invention of *a router bit system*.

Examiner deems that 3 independent claims, and up to 10 dependent claims would more than suffice to cover this concept. Considering that 1 independent claim covering multiple issues is typical in a case, it seems quite reasonable to limit Applicant to 3 independent claims for this one issue.

In response hereto, Applicant should elect up to 3 independent claims and up to 10 dependent claims for further prosecution.

See MPEP 2173.05(n) for further information regarding undue multiplicity.

It is further noted that Applicant need not cancel the non-elected claims at this time.

2. A telephone call was made to Kevin West on 17 August 2005, but did not result in an election of claims.
